Subject to Section 6 of this act, an anatomical gift of a donor's body or part may be made during the life of the donor for the purpose of transplantation, therapy, research, or education in the manner provided in Section 5 of this act by:
1. The donor, if the donor is an adult or if the donor is a minor and is:
   a. emancipated, or
   b. authorized under state law to apply for a driver license because the donor is at least sixteen (16) years of age;

If the donor or other person is physically unable to sign a record, the record may be signed by another individual at the direction of the donor or other person and must:

E. The making of an anatomical gift shall not of itself be construed to authorize or direct the denial of health care when the withholding or withdrawal of such health care will result in or hasten death of the donor.

or injury addressed to at least two adults, at least one of whom is a disinterested witness.

   1. In the manner provided in subsection A of this section for making a refusal;
   2. By subsequently making an anatomical gift pursuant to Section 4 of this act that is inconsistent with the refusal; or
   3. By destroying or canceling the record evidencing the refusal, or the portion of the record used to make the refusal, with the intent to revoke the refusal.
D. Except as otherwise provided in subsection H of Section 8 of this act, in the absence of an express, contrary indication by the individual set forth in the refusal, an individual’s unrevoked refusal to make an anatomical gift of the individual’s body or part bars all other persons from making an anatomical gift of the individual’s body or part.

A. Except as otherwise provided in subsection G of this section and subject to subsection F of this section, in the absence of an express, contrary indication by the donor, a person other than the donor is barred from making, amending, or revoking an anatomical gift of a donor’s body or part if the donor made an anatomical gift of the donor’s body or part under Section 5 of this act or an amendment to an anatomical gift of the donor’s body or part under Section 6 of this act.
B. A donor’s revocation of an anatomical gift of the donor’s body or part under Section 6 of this act is not a refusal and does not bar another person specified in Section 4 or 9 of this act from making an anatomical gift of the donor’s body or part under Section 5 or 10 of this act.
C. If a person other than the donor makes an unrevoked anatomical gift of the donor’s body or part under Section 5 of this act or an amendment to an anatomical gift of the donor’s body or part under Section 6 of this act, another person may not make, amend, or revoke the gift of the donor’s body or part under Section 10 of this act.
D. A revocation of an anatomical gift of a donor’s body or part under Section 6 of this act by a person other than the donor does not bar another person from making an anatomical gift of the body or part
under Section 5 or 10 of this act.

E. In the absence of an express, contrary indication by the donor or other person authorized to make an anatomical gift under Section 4 of this act, an anatomical gift of a part is neither a refusal to give another part nor a limitation on the making of an anatomical gift of another part at a later time by the donor or another person.

F. In the absence of an express, contrary indication by the donor or other person authorized to make an anatomical gift under Section 4 of this act, an anatomical gift of a part for one or more of the purposes set forth in Section 4 of this act is not a limitation on the making of an anatomical gift of the part for any of the other purposes by the donor or any other person under Section 5 or 10 of this act.

G. If a donor who is an unemancipated minor dies, a parent of the donor who is reasonably available may revoke or amend an anatomical gift of the donor’s body or part.

H. If an unemancipated minor who signed a refusal dies, a parent of the minor who is reasonably available may revoke the minor’s refusal.

B. If there is more than one member of a class listed in paragraph 1, 3, 4, 5, 6, 7 or 9 of subsection A of this section entitled to make an anatomical gift, an anatomical gift may be made by a member of the class unless that member or a person to whom the gift may pass under Section 11 of this act knows of an objection by another member of the class. If an objection is known, the gift may be made only by a majority of the members of the class who are reasonably available.

C. A person may not make an anatomical gift if, at the time of the decedent’s death, a person in a prior class under subsection A of this section is reasonably available to make or to object to the making of an anatomical gift.

Added by Laws 2009, c. 139, § 9, eff. Nov. 1, 2009.

A person authorized to make an anatomical gift under Section 9 of this act may make an anatomical gift by a document of gift signed by the person making the gift or by that person’s oral communication that is electronically recorded or is contemporaneously reduced to a record and signed by the individual receiving the oral communication.

B. Subject to subsection C of this section, an anatomical gift by a person authorized under Section 9 of this act may be amended or revoked orally or in a record by any member of a prior class who is
reasonably available. If more than one member of the prior class is reasonably available, the gift made by a person authorized under Section 9 of this act may be:

1. Amended only if a majority of the reasonably available members agree to amending the gift; or
2. Revoked only if a majority of the members agree to the revoking of the gift or if they are equally divided as to whether to revoke the gift.

C. A revocation under subsection B of this section is effective only if, before an incision has been made to remove a part from the donor’s body or before invasive procedures have begun to prepare the recipient, the procurement organization, transplant hospital, or physician or technician knows of the revocation.

1. A hospital; accredited medical school, dental school, college, or university; organ procurement organization; or other appropriate person, for research or education;
2. Subject to subsection B of this section, an individual designated by the person making the anatomical gift if the individual is the recipient of the part; or
3. An eye bank or tissue bank.

B. If an anatomical gift to an individual under paragraph 2 of subsection A of this section cannot be transplanted into the individual, the part passes in accordance with subsection G of this section in the absence of an express, contrary indication by the person making the anatomical gift.

C. If an anatomical gift of one or more specific parts or of all parts is made in a document of gift that does not name a person described in subsection A of this section but identifies the purpose for which an anatomical gift may be used, the following rules apply:

1. If the part is an eye and the gift is for the purpose of transplantation or therapy, the gift passes to the appropriate eye bank;
2. If the part is tissue and the gift is for the purpose of transplantation or therapy, the gift passes to the appropriate tissue bank;
3. If the part is organ and the gift is for the purpose of transplantation or therapy, the gift passes to the appropriate organ procurement organization as custodian of the organ; and
4. If the part is an organ, an eye, or tissue and the gift is for the purpose of research or education, the gift passes to the appropriate procurement organization.

D. For the purpose of subsection C of this section, if there is more than one purpose of an anatomical gift set forth in the document of gift but the purposes are not set forth in any priority, the gift must be used for transplantation or therapy, if suitable. If the gift cannot be used for transplantation or therapy, the gift may be used for research or education.

E. If an anatomical gift of one or more specific parts is made in a document of gift that does not name a person described in subsection A of this section and does not identify the purpose of the gift, the gift may be used only for transplantation or therapy, and the gift passes in accordance with subsection G of this section.

this section, passes to the organ procurement organization as custodian of the organ.

I. If an anatomical gift does not pass pursuant to subsections A through H of this section or the decedent’s body or part is not used for transplantation, therapy, research, or education, custody of the body or part passes to the person under obligation to dispose of the body or part.

J. A person may not accept an anatomical gift if the person knows that the gift was not effectively made under Section 5 or 10 of this act or if the person knows that the decedent made a refusal under Section 7 of this act that was not revoked. For purposes of this subsection, if a person knows that an anatomical gift was made on a document of gift, the person is deemed to know of any amendment or revocation of the gift or any refusal to make an anatomical gift on the same document of gift.

K. Except as otherwise provided in paragraph 2 of subsection A of this section, nothing in this act affects the allocation of organs for transplantation or therapy.

B. Upon or after an individual’s death, a person in possession of a document of gift or a refusal to make an anatomical gift with respect to the individual shall allow examination and copying of the document of gift or refusal by a person authorized to make or object to the making of an anatomical gift with respect to the individual or by a person to which the gift could pass under Section 11 of this act.

A. When a hospital refers an individual at or near death to a procurement organization, the organization shall make a reasonable search of the records of the Department of Public Safety and any donor registry that it knows exists for the geographical area in which the individual resides to ascertain whether the individual has made an anatomical gift.

B. A procurement organization must be allowed reasonable access
to information in the records of the Department of Public Safety to ascertain whether an individual at or near death is a donor.

C. When a hospital refers an individual at or near death to a procurement organization, the organization may conduct any reasonable examination necessary to ensure the medical suitability of a part that is or could be the subject of an anatomical gift for transplantation, therapy, research, or education from a donor or a prospective donor. During the examination period, measures necessary to ensure the medical suitability of the part may not be withdrawn unless the hospital or procurement organization knows that the individual expressed a contrary intent.

D. Unless prohibited by any other provisions of law, at any time after a donor’s death, the person to whom a part passes under Section 11 of this act may conduct any reasonable examination necessary to ensure the medical suitability of the body or part for its intended purpose.

F. Upon the death of a minor who was a donor or had signed a refusal, unless a procurement organization knows the minor is emancipated, the procurement organization shall conduct a reasonable search for the parents of the minor and provide the parents with an opportunity to revoke or amend the anatomical gift or revoke the refusal.

G. Upon referral by a hospital under subsection A of this section, a procurement organization shall make a reasonable search for any person listed in Section 9 of this act having priority to make an anatomical gift on behalf of a prospective donor. If a procurement organization receives information that an anatomical gift to any other person was made, amended, or revoked, it shall promptly advise the other person of all relevant information.

H. Subject to subsection I of Section 11 and Section 23 of this act, the rights of the person to which a part passes under Section 11 of this act are superior to the rights of all others with respect to the part. §63-2200.20A. Life Share Donor Registry.
A. There is hereby established within the State Department of Health, an organ, eye and tissue donor registry for the State of Oklahoma to be known as the "Life Share Donor Registry". The Department is authorized to contract with the designated organ procurement organization who shall act on behalf of the Department by carrying out the functions of the Department in the administration of the registry, in compliance with 18 U.S.C. Section 2721. The contract between the Department and the designated organ procurement
organization shall be subject to the concurrence and approval of the Department of Public Safety.

2. The registry shall maintain and update as needed the pertinent information on all Oklahomans who have indicated a willingness to be an organ donor, eye donor or tissue donor by a designation on a driver license, a state identification card, a donor card, an online or other organ donor registry enrollment form, or any other document of gift.

3. The registry and all information therein shall be confidential and shall be subject to access only by the designated organ procurement organization and by eye banks and tissue banks licensed by the State of Oklahoma seven (7) days a week, twenty-four (24) hours per day; however, the personal information and highly restricted personal information shall only be available to the designated organ procurement organizations solely for the purpose of identifying a potential donor and only when acting on behalf of the State Department of Health as prescribed in paragraph 1 of this subsection. The placement of any personal information and highly restricted personal information on the registry that, at the time of placement, was confidential under the Open Records Act or the Driver's Privacy Protection Act (DPPA), 18 U.S.C. Sections 2721 through 2725, shall remain confidential.

4. The purpose of the registry shall include, but not be limited to:
   a. providing a means of recovering an anatomical gift for transplantation or research, and
   b. collecting data to develop and evaluate the effectiveness of educational initiatives promoting organ, eye and tissue donation.

B. Procedures to administer the Life Share Donor Registry shall specify:

1. The information placed in the registry may include personal information and highly restricted personal information, as defined in 18 U.S.C. Section 2721, and access to such information shall conform to the Driver's Privacy Protection Act (DPPA), 18 U.S.C. Sections 2721 through 2725;

4. The method for making information on the registry available to the designated organ procurement organizations and to tissue banks and eye banks licensed by the State of Oklahoma;

5. Limitations on the use of and access to the registry;

6. A toll-free telephone number, available twenty-four (24) hours a day, for use by the public to obtain information on becoming an organ, tissue or eye donor;

7. A process for establishing, implementing, maintaining, and administering an online organ, eye and tissue donor registration process and ensuring the confidentiality of information provided;

8. A process for a donor who has registered online to sign a confirmation card that will be returned to the designated organ procurement organization and made part of the registry record; and

9. Procedures for collaborating with the Department of Public Safety to transmit stored driver license data by the Department of Public Safety, in conformance with 18 U.S.C. Section 2721, to the Life Share Donor Registry maintained by the designated organ procurement organization, and to ensure the confidentiality of such information for present and potential donors. Monies credited to the Oklahoma Organ Donor Education and Awareness Program Revolving Fund created in Section 2220.3 of Title 63 of the Oklahoma Statutes may be used for a one-time transfer to the Department of Public Safety for the reasonable costs associated with the initial installation and setup of equipment and software for electronic transfer of donor information. All actual electronic transfers of donor information shall be at no charge to the designated organ procurement organization; however, all costs associated with the creation and maintenance of the Life Share Donor Registry shall be paid by the designated organ procurement organization.

C. Information obtained by the designated organ procurement organization shall be used for the purpose of:

§ 63-2200.21A. Effect of anatomical gift on advance health care directive.

A. As used in this section:

1. “Advance health care directive” means a power of attorney for health care or a record signed or authorized by a prospective donor containing the prospective donor’s direction concerning a health care decision for the prospective donor;

2. “Declaration” means a record signed by a prospective donor specifying the circumstances under which a life support system may be withheld or withdrawn from the prospective donor; and

3. “Health care decision” means any decision regarding the health care of the prospective donor.

B. If a prospective donor has a declaration or advance health care directive and the terms of the declaration or directive and the express or implied terms of a potential anatomical gift are in conflict with regard to the administration of measures necessary to ensure the medical suitability of a part for transplantation or therapy, the prospective donor’s attending physician and prospective donor shall confer to resolve the conflict. If the prospective donor is incapable of resolving the conflict, an agent acting under the prospective donor’s declaration or directive, or, if none or the agent is not reasonably available, another person authorized by law other than this act to make health care decisions on behalf of the prospective donor, shall act for the donor to resolve the conflict. The conflict must be resolved as expeditiously as possible.

Information relevant to the resolution of the conflict may be obtained from the appropriate procurement organization and any other person authorized to make an anatomical gift for the prospective donor under Section 9 of this act. Before resolution of the conflict, measures necessary to ensure the medical suitability of the part may not be withheld or withdrawn from the prospective donor if withholding or withdrawing the measures is not contraindicated by appropriate end-of-life care.

NOTE: This section was held unconstitutional by the Oklahoma Supreme Court in the case of Weddington v. Henry, 202 P.3d 143, 2008 OK 102 (2009).

§ 63-2200.22A. Cooperation between medical examiner and procurement organizations.

A. A medical examiner shall cooperate with procurement organizations to maximize the opportunity to recover anatomical gifts for the purpose of transplantation, therapy, research, or education.

B. If a medical examiner receives notice from a procurement organization that an anatomical gift might be available or was made with respect to a decedent whose body is under the jurisdiction of the medical examiner and a postmortem examination is going to be performed, unless the medical examiner denies recovery in accordance with Section 23 of this act, the medical examiner or designee shall conduct a postmortem examination of the body or the part in a manner and within a period compatible with its preservation for the purposes of the gift.

C. A part may not be removed from the body of a decedent under the jurisdiction of a medical examiner for transplantation, therapy, research, or education unless the part is the subject of an anatomical gift. The body of a decedent under the jurisdiction of the medical examiner may not be delivered to a person for research or education unless the body is the subject of an anatomical gift. This subsection does not preclude a medical examiner from performing the medicolegal investigation upon the body or parts of a decedent under the jurisdiction of the medical examiner.

§63-2200.23A. Facilitation of anatomical gift from body of decedent under medical examiner’s jurisdiction.

A. Upon request of a procurement organization, a medical examiner shall release to the procurement organization the name, contact information, and available medical and social history of a decedent whose body is under the jurisdiction of the medical examiner. If the decedent’s body or part is medically suitable for transplantation, therapy, research, or education, the medical examiner shall release postmortem examination results to the procurement organization. The procurement organization may make a subsequent disclosure of the postmortem examination results or other information received from the medical examiner only if relevant to transplantation, therapy, research or education.

B. The medical examiner may conduct a medicolegal investigation by reviewing all medical records, laboratory test results, x-rays, other diagnostic results, and other information that any person possesses about a donor or prospective donor whose body is under the jurisdiction of the medical examiner that the medical examiner determines may be relevant to the investigation.

C. A person who has any information requested by a medical examiner pursuant to subsection B of this section shall provide that information as expeditiously as possible to allow the medical examiner to conduct the medicolegal investigation within a period compatible with the preservation of parts for the purpose of transplantation, therapy, research, or education.

D. If an anatomical gift has been or might be made of a part of a decedent whose body is under the jurisdiction of the medical examiner and a postmortem examination is not required, or the medical examiner determines that a postmortem examination is required but that the recovery of the part that is the subject of an anatomical gift will not interfere with the examination, the medical examiner and procurement organization shall cooperate in the timely removal of the part from the decedent for the purpose of transplantation, therapy, research, or education.

E. The medical examiner and procurement organizations shall enter into an agreement setting forth protocols and procedures to govern relations between the parties when an anatomical gift of a part from the decedent under the jurisdiction of the medical examiner has been or might be made, but the medical examiner believes that the recovery of the part could interfere with the postmortem investigation into the decedent’s cause or manner of death. Decisions regarding the recovery of organs, tissue and eyes from such a decedent shall be made in accordance with the agreement. In the event that the medical examiner denies recovery of an anatomical gift, the procurement organization may request the Chief Medical Examiner to reconsider the denial and to permit the recovery to proceed. The parties shall evaluate the effectiveness of the protocols and procedures at regular intervals but no less frequently than every two (2) years.

F. If the medical examiner or designee allows recovery of a part under subsection D or E of this section, the procurement organization, upon request, shall reimburse the medical examiner or designee for the additional costs incurred in complying with subsection E of this section.
