## Purpose:

This comprehensive and interactive course on the organ donation process in the U.S. is intended to educate physicians, advanced clinicians and other members of the multi-disciplinary healthcare team about the history and overall system, clinical considerations and administrative processes, as well as their roles and responsibilities. The course will utilize multiple teaching modalities, including lectures, case-scenarios and video. Please visit [organdonationalliance.org/ODASSCE](http://organdonationalliance.org/ODASSCE) for a complete listing of course topics covered.

## Objectives:

By the end of this course, the participant will be able to:

- Describe the historic and present overview of the U.S. organ donation and transplantation system and discuss the legal and ethical considerations.
- Identify basic characteristics of a potential donor and define the two potential pathways for cadaveric organ donation.
- Explain both administrative and medical aspects involved in the donation process, such as determination of brain death, donation facilitation in special situations, and the physician role, intensivist and palliative care, in end-of-life care in the ICU.
- Identify and describe the principles and goals of organ donor management.
- Discuss the psychosocial and grief resource needs and identify principles of effective communication with a potential donor family.
- Articulate and describe the factors and practices which contribute to a culture of donation in a hospital system and a successful integration of organ donation into hospital processes, through collaboration between the hospital and organ procurement organization.
- Describe the significant benefits of donation and its personal impact on patients and families.

## Course Outline:

Visit [organdonationalliance.org/ODASSCE](http://organdonationalliance.org/ODASSCE) to view a list of topics covered throughout this course.

## Target Audience:

Physicians, advanced practitioners, nurses, respiratory therapists, administrators, social workers, pastoral care and other healthcare professionals who may be involved in the organ donation process

## CE Credit

- The Organ Donation and Transplantation Alliance will be offering **8.0 Category I CEPTC credits** from the American Board for Transplant Certification.
- This course is co-sponsored by Iowa Donor Network, Iowa Board of Nursing Provider #326. The forum is approved for **8.0 nursing contact hours**. No partial credits will be awarded. CE credit will be issued upon request within 14 days post forum.
- WRTC designates this live activity for a maximum of **8.0 AMA PRA Category 1 Credits™**. The Alliance has applied for 8.0 credits. Physicians should claim only the credit commensurate with the extent of their participation in the activity. This activity has been planned and implemented in accordance with the accreditation requirements and policies of the ACCME through the joint providership of WRTC and The Alliance. WRTC is accredited by the ACCME to provide continuing medical education for physicians.
