

Navigating the Waters of Post-Transplant Nutrition: How to Help Patients Stay Afloat

When:

Thursday, February 28, 2019
3-4pm ET / 12pm-1pm PT

Speaker(s):

Megan C. Hanson, RDN, LDN, CNSC
Transplant Clinic Dietician
Sodexo Healthcare System, Erlanger
Health System
Chattanooga, TN

Madison Hilgendorf, MS, RD, CSO, LD
Transplant Clinic Dietician
University of Kentucky Healthcare
Lexington, KY

Purpose:

The implementation of good nutrition plays a key role in transplantation. Special considerations must be made when caring for a recipient post-surgery in order to maintain organ function and the patient's overall health. Unfortunately, post-transplant nutrition has proven to be a struggle for patients and their caregivers. As a result, transplant programs are often faced with the challenge of managing the opposing perspectives of the healthcare team and their patients. Join us as we hear from two knowledgeable transplant dietitians who will share their experiences, strategies, and innovations pertaining to post-transplant nutrition.

Objectives:

At the end of the webinar, participants should be able to:

- Identify common post-transplant nutrition issues and potential barriers.
- List ways to bridge the gap between patients and the medical team regarding nutrition.
- Explain how two different transplant centers structure their post-transplant nutrition programs.
- Describe strategies that can be used to improve overall post-transplant nutrition

Target Audience:

Administrators • Coordinators • Physicians • Nurses • Surgeons • Managers • Quality Improvement • Social Workers • Other Donation and Transplantation Professionals

Register at OrganDonationAlliance.org/webinar-series
