A Legacy of Hope and Second Chances

The Wall of Life is a traveling exhibit that is a floor display and highlights individuals in our area who have been personally impacted by donation and transplantation.

This worthwhile project was funded by a grant from the law firm Keating Muething & Klekamp, and secured by a dedicated Donate Life Ambassador, Mrs. Dana Siegel, in April 2008. Dana was not only an incredible advocate for donation awareness and education, but also a double lung transplant recipient who understood the importance of sharing her story with everyone she met along the way.

The Wall of Life is more than just an educational tool for us, it is a legacy and a testament of the positive impact that organ and tissue donation has on our community. The commitment for scheduling the Wall of Life is for an entire month and for it to be displayed in a location at your office that is a high traffic area for optimal visibility.

LifeCenter will set the wall up and the beginning of your scheduled month and will then take it down at the end of the month. The wall is 7x10.5 feet and has six foldable panels that can be adjust to accommodate smaller areas than the 10.5 feet length would normally allow.

If you would like more information about the Wall of Life or if would like to schedule the wall for your office, please call or email Jeannie Kuhn at 513-315-0393 or jkuhn@lifepassiton.org. Thank you.

We are now scheduling the Wall of Life for 2019!
