ENGAGE

Purpose:

This full-day interactive course, developed and presented by field experts, broadly examines the comprehensive donation and transplant process for the multidisciplinary healthcare team. ODASSCE utilizes multiple teaching modalities, including lecture, case scenario and video to address the history of donation and transplantation, as well as the overall system, clinical considerations, administrative processes, roles and responsibilities within the comprehensive organ donation process. Please visit organdonationalalliance.org/ODASSCE for a complete listing of course topics covered.

Objectives:

By the end of this course, the participant will be able to:

- Describe the historic and present overview of the U.S. organ donation and transplantation system and discuss the legal and ethical considerations.
- Identify basic characteristics of a potential donor and define the two potential pathways for cadaveric organ donation.
- Explain both administrative and medical aspects involved in the donation process, such as determination of brain death, donation facilitation in special situations, and the physician role, intensivist and palliative care, in end-of-life care in the ICU.
- Identify and describe the principles and goals of organ donor management.
- Discuss the psychosocial and grief resource needs and identify principles of effective communication with a potential donor family.
- Articulate and describe the factors and practices which contribute to a culture of donation in a hospital system and a successful integration of organ donation into hospital processes, through collaboration between the hospital and organ procurement organization.
- Describe the significant benefits of donation and its personal impact on patients and families.

Target Audience:

Early-career critical care providers, medical students, residents, fellows, nurses, physicians, attendings, respiratory therapists, advanced clinicians, early-career OPO professionals, administrators, social workers, pastoral care and other healthcare professionals who may be involved in the organ donation process.

Course Outline:

Visit organdonationalalliance.org/ODASSCE to view a list of topics covered throughout this course.

CE Credit

CEPTC, RN and CME Credits are pending approval. Once approved, additional information will be provided at organdonationalalliance.org/ODASSCE.

Faculty:

- **Christopher Michetti, MD, FACS, FCCM - Course Chair**
Associate Chief, Trauma/Acute Care Surgery, Inova Fairfax Hospital, VA
- **Galen Henderson, MD - Course Chair**
Director, Neuroscience ICU, Brigham and Women's Hospital, MA
- **Harry E. Wilkins III, MD, MHCM, FACS**
Acute Care Surgeon, Quincy Medical Group, IL
& Administrative Medical Director, Midwest Transplant Network, MO
- **Charley Wright, MD**
Medical Director, LifeLink of Florida, FL

Cost:

Discounted pricing is offered for Alliance Executive, Partner and Colleague level Professional Partners. Special bundle rates are available for those who wish to register for both ODASSCE and the National Donor Management Summit. Visit organdonationalalliance.org/ODASSCE for more information.
